

# How to replace damaged photovoltaic panels

Should you repair or replace a cracked solar panel?

If your solar panel is cracked, it is easier and safer to replace the panel rather than try to repair it. It is important to remove the glass as soon as possible to stop any possible damage to the solar cells. In this blog we discuss: Why you should replace defective solar panels rather than repair them.

What should I do if my solar panel is damaged?

When dealing with broken or damaged solar panels, it is crucial to assess the extent of the damage before proceeding with any repairs or replacements. This process comprehensively evaluates the panel's physical condition and electrical performance. Begin by conducting a meticulous visual inspection of the solar panel.

Can You reattach a broken solar panel?

While it will still work, you can't reattach parts that have broken off. Be wary of websites or people who tell you that they can repair your solar panels. PV panels require the cells to be completely sealed to allow optimum performance. The only way to repair the damage for optimum output is to replace the panel.

How do you fix a solar panel with broken glass?

The best way to fix a solar panel with broken glass is to replace it. Most solar panels are under warranty, and the standard warranty is generally for 25-years. If there is another issue with the solar panel, such as a bad microinverter, you would still replace the panel.

What happens if a solar panel is damaged?

Regular maintenance and inspections can help identify electrical component damage early on, preventing further complications and ensuring the optimal performance of your solar panel system. In certain cases, even if a solar panel is damaged, it may retain some functionality.

What happens if a solar panel inverter is damaged?

Damage to the inverter or other electrical components can impact the overall functionality of the solar panel system. In such cases, consulting with a qualified electrician or solar professional is crucial to evaluate and repair the damaged components.

The rate to remove and replace a single panel is around \$100 per hour, and the average cost of the replacement unit is \$150 to \$350 per hour. Costs \$1,800 to \$2,100 to remove an old system and \$17,900 to \$33,700 in solar installation ...
