How do I interlock solar panels?

Most solar panels come with pre-installed MC4 connectors, which will allow you to interlock solar panels between them. For the ending points of the system, you may be able to use an MC4 extension cable that generally comes in multiple sizes to interconnect the PV system and the inverter.

Which inverter is best for solar panels?

String inverters or centralized inverters are the most common option in PV installations, suitable for solar panels wired in series or series-parallel. Centralized inverters convert DC power for the whole string, which is why they are recommended for PV systems not subjected to partial shading.
