

How to use electricity after buying a photovoltaic panel

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

What is a solar electric or photovoltaic (PV) system?

A solar electric or photovoltaic (PV) system is a system that can reliably produce electricity for your home or office. These small or distributed solar systems are often installed by home or business owners to offset their electricity costs.

Is solar power a good option for your home?

Solar power can be an attractive prospect for homeowners and shoppers. Home solar technology offers electricity bill savings, more energy independence, and resilience in the face of an increasing rate of power outages. For the environmentally conscious, it provides an eco-friendly alternative to existing electricity sources.

Should you buy or lease solar panels?

With a PPA, you agree to buy the electricity generated by the solar panels from the solar company at a set rate. Leases and PPAs can be a good option if you don't want to make a large upfront investment in solar panels, or if you're not sure how long you'll be living in your home.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

How can I use my solar energy more reasonably?

To use your solar energy more reasonably you can look for ways to decrease your energy spendings. Electric bills or power meters can help you to find the most costly appliances. Some of them are simply old and consume more electricity than they used to. Others can be replaced with much more energy-efficient devices.
