

How to use the solar panels you bought

Can you buy a home with solar panels?

If the seller of your soon-to-be home outright owns the solar panels, that's ideal; the panels will likely only affect the home's price. If you buy a home with leased solar panels, though, you'll want to discuss any lease terms and monthly fees associated with the system. 6. What's the difference between solar loans and financing?

Should you buy a solar-powered home?

Buying a solar-powered home can jumpstart your clean energy transition, joining millions of other American households that are powering their lives with sunshine. See more solar energy resources for consumers and learn how solar works.

Should you sell a solar panel system?

The reduction in electricity bills can save the homeowner more than a hundred dollars a month in some cases. But it asks the buyer to do thorough research into how the solar panel system was constructed and paid for. The seller will likely have baked the cost of their investment into the sale price.

How do I buy a solar system?

For example, you may have just bought new energy-efficient appliances, or you could be planning to buy an electric vehicle that will need charging. Evaluate your finance options. You can buy or lease a PV system. Buyers can either purchase a system outright or obtain a solar loan.

How does a solar panel system work with my home?

Exactly how the solar panel system works with your home and the electric grid will depend on the type of solar panel system you have. There are three main types of home solar systems: grid-tied, hybrid (or solar-plus-storage), and off-grid. The following videos outline how different solar system types work:

Is buying a home with solar panels the right move?
