What are Huawei alarm codes?

The following are some codes you may get from a Huawei inverter, which are called AlarmIDs. Huawei inverters display codes (known as Alarm IDs) for memory issues, failed internal tests, measurement issues, and other faults.

How to replace a faulty Huawei inverter?

Huawei's warranty replacement process is straightforward. First, the Hotline Team needs to confirm the replacement. Next, you'll have to follow these steps: Step 1: Fill out a Faulty Tag form with the details about your faulty inverter and send it to the Hotline Team.

Why is the PV array not properly configured?

The PV array is not properly configured. Excessive PV modules are connected in series to PV strings 1 and 2, and therefore the PV string open-circuit voltage exceeds the maximum value of the inverter MPPT voltage. The PV array is not properly configured.

In addition to the usual data on the place of installation and on the photovoltaic generator, it will be sufficient to enter the annual consumption of the home. At the output, the ...
