

If you need to replace a photovoltaic panel

Should I replace my roof and get solar panels at the same time?

Replacing your roof and getting solar panels at the same time can even provide some benefits. When you install solar panels and a new roof at the same time, it's very unlikely you'll need to re-roof during your system's lifetime. Solar panels are more durable than most roofing materials and can extend the life of the roof shingles they cover.

Can I install a new roof if I have solar panels?

Though you can install a new roof while panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.

Do you need a roof inspected before installing solar panels?

It is crucial that you have your roof inspected by a reliable roofing contractor prior to having any solar company install solar panels onto your roof. This is true especially if you are not aware of when the roof was last replaced. A typical roof will last around 20-25 years before having to be replaced.

Is a new roof compatible with solar panel reinstallation?

It's important to ensure that the new roof is compatible with solar panel reinstallation. Panel reinstallation: Once the roof work is complete, the solar panels need to be reinstalled. This stage might require a reassessment of the panel layout or system configuration to optimize performance on the new roof structure.

Can roof replacement & solar panel installation be a smart move?

We will delve into how the convergence of roof replacement and solar panel installation can be an intelligent move toward a more sustainable and energy-efficient home. Cost efficiency: Replacing a roof and installing solar panels simultaneously can be more cost-effective in the long run.

Can you put solar panels on an old roof?

If your roof is old, the answer is no--at least not until you replace it. Asphalt shingles that are 10 years old or more should be replaced before adding a solar array on top, says Ana Almerini, a spokesperson for SolarReviews. New solar panels are warranted to last, on average, 25 years, while most roofs are warranted for 30 years or less.

As established above, these standards indicate the solar panel has been tested for hail impact and can withstand between one inch to three inches of hailstone ice balls traveling at 16.8 mph to 88.3 mph. Knowing your solar panel passed ...
