On the first day of the conference, PVBL's annual ranking of the Top 20 Global Photovoltaic Inverter Brands was announced. Preferential policies promoted the inverter market growth in 2023. Most of the major inverter companies won a large amount of orders and expanded their capacity with high shipment volume.

Why is hopewind a top 10 PV inverter brand in China?

When the industry experienced serious supply shortages and product stability was affected, Hopewind launched the ground-breaking IGBT single-tube parallel connection solution, thus achieving continued robust performance, and have been then recognized as the Top 10 PV inverter brand in China. Energizing power electronics industry

What is a 4th IGBT?

The fourth IGBT is a trench-gate IGBT optimized to deliver low conduction and switching losses for high-frequency switching such as in solar inverter applications. An IGBT is basically a bipolar junction transistor (BJT) with a metal oxide semiconductor gate structure.

Are insulated-gate bipolar transistors a good choice for solar inverter applications?

For solar inverter applications, it is well known that insulated-gate bipolar transistors (IGBTs) offer benefits compared to other types of power devices, like high-current-carrying capability, gate control using voltage instead of current and the ability to match the co-pack diode with the IGBT.

When did photovoltaic inverters come out?

As early as 2013, Hopewind pioneered the distributed photovoltaic inverter solution in China, and in the following year, it realized the batch shipment of the first distributed photovoltaic inverters. From 2020 to 2022, due to the impact of the COVID-19 epidemic, the supply of IGBT modules for photovoltaic inverters were tight globally.
