

Install solar light bracket accessories

What is a solar panel mounting bracket?

Refer to section "Installation handover" This solar panel mounting bracket is a robust and versatile galvanised mild steel bracketsuitable for mounting a variety of solar panels between 20W and 150W in size,against a wall or on a post.

How do you mount a solar panel bracket?

For brackets rated between 20W and 80W, align the short edge of the solar panel to the top edge of the bracket (Figure 3). For solar panels rated between 100W and 150W, align the long edge of the solar panel to the top edge of the bracket (Figure 3). 5.2. Mounting options 5.2.1. Vertical pole mount

How do I install a solar panel fixture?

Your fixture may look different than the one depicted below. Slide the fixture onto the arm,level it,and then tighten the fixture with mounting bolts. Before installing,verify that your inclination angle for the solar panel is provided.

Where can I find solar panel mounting kits & hardware?

Find solar panel mounting kits &hardware at Lowe'stoday. Shop solar panel mounting kits &hardware and a variety of electrical products online at [Lowe's.com](https://www.lowes.com).

How do I choose a solar light installation site?

Ensure your solar light installation site is free of obstructions from access to the sun. Also,you'll want to ensure there aren't foreign light sources that can interfere with the panel's light sensor. Keep the pole away from heat sources and ensure it's on level,solid ground (we can accommodate if the soil isn't the most sturdy).

How to install solar panels?

Affix the mounting bracket to the solar panels with bolts and nuts. Connect the cables from the panels to the cables coming from the pole. Ensure the waterproof connectors are connected securely. Use a multimeter to test the panel voltage. This test must be done during the day. The voltage output of the panel must be around 20V (per panel).
