

# Installation diagram of photovoltaic bracket on sloping roof

How do I install a solar PV system?

Install a mounting system for solar thermal or solar photovoltaic panels. Consider the roof type (material and slope), weatherproofing, installation convenience, and wind and snow loadings. Choose an appropriate racking and mounting system for the type of PV module, and install the system along with needed flashing and seals.

Are solar stack roof mounting systems ul 2703 listed?

Solar Stack Roof mounting systems are UL 2703 listed. Standard for safety UL/ANSI 2703, Mounting Systems, Mounting devices, Clamping/Retention Devices and Ground lugs for use with PV modules. Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703.

How do you install solar panels on a roof?

The first step in the physical installation process is securing the roof attachments supporting the solar panels. First, the installer will find the rafters beneath your roof shingles. They'll either use a stud finder or measure from the roof's edge to find the rafters, typically spaced 16-24 inches apart.

What is a good roof angle for solar panels?

In the Northern Hemisphere, a south-facing roof pitched between 30 and 45 degrees is considered ideal for solar panels. Your roof should be in good condition and able to support the additional weight. You should also identify obstructions, such as nearby trees or buildings, that could cast shadows on your panels.

Can you install solar power on a tiled roof?

QuickMountPV offers up an installation guide - with a very nice series of images - for those installing solar power on top of tiled roofs. In this installation tweet from Sunrun, you can see how to attach to the plywood base layer of a roof.

How do I install a solar stack roof?

Surface Preparation. All roof surfaces must be free of any debris, dirt, grease, oil, and standing water before adhesive is applied. Follow adhesive manufacturers application instructions. Tile roofs: Tiles must be cut to the proper size of the Solar stack pedestal (+/- 1"). Clean the hole of any sawdust with appropriate tools and materials.

QuickMountPV offers up an installation guide - with a very nice series of images - for those installing solar power on top of tiled roofs. In this installation tweet from Sunrun, you can see how to attach to the plywood base ...

Technical drawings showing installation of integrated solar PV and solar thermal panels in slate and tile roofs
