

# Is it expensive to install photovoltaic panels on the roof

How much does it cost to install solar panels on a roof?

The cost of a dual installation of solar panels and a roof is a large purchase for most homeowners. According to the National Renewable Energy Laboratory (NREL), the average installation cost for a residential rooftop solar array alone is \$19,000. If the solar array is installed simultaneously with a new roof, the average is \$25,000.

How much do solar panels cost?

Receive up-to-date information and news about what is going on in the solar industry, updates on our services and features, and more. Solar panels cost an average of \$19,000 to install. That's expensive - but there are ways to reduce solar costs and increase savings.

Should you install a solar energy system on your roof?

When you install a solar energy system, you're getting more than just solar panels on your roof. Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home. There are also a number of costs that ensure your system is installed correctly and that the solar company can operate.

How much does a rooftop solar system cost?

Mounting system: This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. Electrical wiring and hardware: This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does a rooftop solar array cost?

According to the National Renewable Energy Laboratory (NREL), the average installation cost for a residential rooftop solar array alone is \$19,000. If the solar array is installed simultaneously with a new roof, the average is \$25,000. These costs can be mitigated, too.

Should you replace your roof before installing solar panels?

And if you're also replacing your roof before the solar system installation, consider steel standing seam. It combines the lightweight strength to support solar panels and the longevity to outlast them. The ideal roof for solar is one facing south with enough slope to properly tilt the panels and enough room for them.
