

# Is the community new to solar power generation

What are the benefits of community solar?

Community solar can allow all households and businesses to access the benefits of solar energy, such as lower electricity costs, regardless of whether they're able to host a system on their own roof. And, in areas where solar power is less expensive than fossil-generated electricity (most places), consumers can save money on their monthly bills.

What is community solar?

Community solar is a form of solar energy generation that allows all community members to access the incredible cost-saving and public health benefits of renewable energy, such as lower utility bills, community ownership and wealth-building, increased energy resilience, equitable workforce development, and low- and moderate-income household access.

How many states have community solar projects?

Currently, there is at least one community solar project in 43 states and the District of Columbia (DC). Of those, 22 states and DC have passed "enabling legislation" that encourages or mandates community solar in their jurisdictions. States with enabling legislation typically have more projects developed and subscriptions available.

How does community solar work?

The local utility pays the community solar provider for the energy generated, and each subscriber receives a portion of the dollar value generated by their community solar subscription as a credit. Typically, this credit is applied directly to a subscriber's monthly electric bill, helping to reduce customers' electricity costs. Why Community Solar?

How many megawatts can a community solar project power?

Successful teams have the potential to deploy as much as 150 megawatts of community solar across the country--enough to power nearly 30 thousand American homes--and access \$5 billion in private sector financing through the Community Power Accelerator(TM).

How will Colorado's New community solar law impact the community?

The new law will modernize Colorado's community solar program by building upon what has worked well in more than 20 other states. Among the specific benefits, the new law will: Improve the methods that third-party stakeholders use to develop community solar projects with investor-owned utilities.
