Should you install a solar energy system on your roof?

When you install a solar energy system, you're getting more than just solar panels on your roof. Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home. There are also a number of costs that ensure your system is installed correctly and that the solar company can operate.

Should I install a ground-mounted solar system?

Overall, installing a ground-mounted solar system can greatly reduce your monthly costs, save on taxes, and set your property up for long-term, sustainable savings. Many solar panels have 25- or 30-year warranties, guaranteeing they'll produce a significant amount of free electricity for many years to come.

Do ground-mounted solar panels cost more?

Generally, ground-mounted solar panels will cost more to install than an equally sized roof-mounted system. This is partly due to the structure on which the solar panels are installed. A rooftop system is supported by the roof, and the building's structure, meaning erecting a supporting structure is unnecessary.
