

# Latest news on energy storage container policy

What are the different types of energy storage policy?

Approximately 16 states have adopted some form of energy storage policy, which broadly fall into the following categories: procurement targets, regulatory adaption, demonstration programs, financial incentives, and consumer protections. Below we give an overview of each of these energy storage policy categories.

What is a hithium energy storage container?

Hithium is releasing a 5-MWh energy storage container product using a standard 20-ft container structure. This second generation ESS for Hithium comes pre-installed and ready to connected. Outfitted with 48 battery modules (each 104.5-kWh lithium iron-phosphate units), the system is designed to meet the needs of large utility-scale systems.

Can a PTC-electing energy production facility be paired with an energy storage facility?

Principally, this means that a PTC-electing eligible energy production facility (such as a solar facility now eligible to elect to use the PTC after the IRA) may be paired with an energy storage facility without impacting the ability to claim an ITC for the storage facility.

Lithium-ion battery manufacturer CATL has launched its latest grid-scale BESS product, with 6.25MWh per 20-foot container and zero degradation over the first five years, the company claimed. The China ...
