

Latest wind power plant loan policy

Is SunZia wind power project eligible for a green loan?

Clearly, there has been widespread agreement on the eligibility of the SunZia wind power project for a green loan. "The financings are structured as green loan facilities in alignment with the Green Loan Principles," Pattern Energy emphasized in its press release of December 27.

Should wind projects be built against merchant power prices?

On-Shore Wind Project Finance Model with Detailed Assumptions and Curtailment As time goes by and wind projects become more economic because of more efficient turbines with power curves that can secure wind at lower speeds, the question of building projects against merchant power prices is becoming more and more of an issue.

What are wind project finance models?

In the models, the debt size can be driven by one criteria, but the IRR is derived from a different wind probability assumption. Another set of wind project finance models are explained in the wind resource section include databases of power curves.

Are tax issues affecting wind project financing?

Tax issues, in particular, have dominated negotiations of wind project financings since the latest phase down of the PTC was implemented in the wake of Congress's sweeping tax reform package in 2017, artfully titled the "Tax Cuts and Jobs Act." II. Project Finance Basics. A. Risk Shifting.

What if a wind project is financed by a sponsor?

D. Permanent Loans. Following achievement of COD and completion of construction of a wind project, a sponsor will typically trade its restrictive and expensive construction debt for (or convert it into) permanent financing, allowing recoupment of invested capital.

What issues can arise in project financing of off-shore wind?

The file you can download below is intended to show some issues that can arise in project financing of off-shore wind. The model includes resolution of circular references, re-financing and the return that can be generated by selling a plant after the risk of the plant declines.
