What is solar land leasing?

Solar land leasing involves granting the rights to develop and operate solar power installations on your land to a solar energy company or developer. Instead of purchasing the land outright, these companies lease the land from you, typically for a long-term period. How does solar land leasing work?

How do I get a land lease for a solar farm?

You'll need to connect with a solar developer to secure a land lease for a solar farm. By following these four steps, you can put your land to use generating solar energy: If developers haven't tried to connect with you already, research which solar developers are offering solar farm leases in your area.

Should landowners negotiate a solar lease agreement?

On the other hand, landowners are usually motivated to limit the land affected by solar lease agreements to retain control over non-solar-related uses and leasing opportunities. Therefore, careful consideration and negotiation of the land subject to the lease agreement is crucial early in the process.

What is a pre-lease agreement for a solar farm?

Once a developer approves your land, they offer two possible pre-lease agreement options: Lease option: This option provides the lease terms but gives the developer time to decide whether to commit to a lease with you. For instance, they may need to determine how much land they will ultimately need for the solar farm.
