

What are the benefits of lithium batteries?

Therefore, the use of lithium batteries almost involves various fields as shown in Fig. 1. Furthermore, the development of high energy density lithium batteries can improve the balanced supply of intermittent, fluctuating, and uncertain renewable clean energy such as tidal energy, solar energy, and wind energy.

How to improve the energy density of lithium batteries?

Strategies such as improving the active material of the cathode, improving the specific capacity of the cathode/anode material, developing lithium metal anode/anode-free lithium batteries, using solid-state electrolytes and developing new energy storage systems have been used in the research of improving the energy density of lithium batteries.

Why are lithium-oxygen batteries important?

In recent years, lithium-oxygen (Li O₂) batteries have attracted much attention from researchers because of their high theoretical energy density (3500 Wh kg⁻¹) and occupy an important position in the field of new energy storage devices [208,217,218].

What is a lithium based battery?

'Lithium-based batteries' refers to Li ion and lithium metal batteries. The former employ graphite as the negative electrode 1, while the latter use lithium metal and potentially could double the cell energy of state-of-the-art Li ion batteries 2.

Can Li-ion batteries be used for energy storage?

The review highlighted the high capacity and high power characteristics of Li-ion batteries makes them highly relevant for use in large-scale energy storage systems to store intermittent renewable energy harvested from sources like solar and wind and for use in electric vehicles to replace polluting internal combustion engine vehicles.

How to calculate energy density of lithium secondary batteries?

This is the calculation formula of energy density of lithium secondary batteries: Energy density (Wh kg⁻¹) = $Q \cdot V / M$. Where M is the total mass of the battery, V is the working voltage of the positive electrode material, and Q is the capacity of the battery.
