

Looking for cooperative solar power stations

Can a co-op use solar power at night?

The SUNDA project concludes with a dramatically transformed energy landscape in rural America. An electric co-op is adding enough energy storage to give members access to solar power at night. Washington Electric Co-op's Button Up program offers ways to save energy and money. Solar power, great sound and shade, too?

Can a solar co-op save money?

Joining together with other people who also want to go solar can result in saved money through the bulk purchase of solar technologies. That's the logic behind solar cooperatives, or co-ops. A solar co-op is made up of individuals, businesses, or both, partnering up to meet their shared energy needs and typically receiving bulk discounts.

Could a new solar array help a co-op in Arkansas?

Co-ops go behind the meter to find out. In Arkansas, energy from the sun and food for wildlife, too: A new solar array will provide both. The SUNDA project concludes with a dramatically transformed energy landscape in rural America. An electric co-op is adding enough energy storage to give members access to solar power at night.

Are there other organizations that facilitate solar co-ops?

In addition to Solar United Neighbors, there are several other organizations that facilitate solar co-ops, like Solarize and Solar Crowd Source. Solar co-ops enable members to easily learn about all aspects of solar in partnership with their fellow co-op members.

Are community solar panels better than co-op solar?

Community solar is a great option for people who rent their homes, live in condo buildings, or don't have a suitable roof. Co-ops, on the other hand, are a good option for Americans who want the benefits of installing rooftop solar arrays but are concerned about upfront installation costs and "soft costs" like permitting.

What is cooperative solar farm one?

We've embraced the future by building Cooperative Solar Farm One, one of the largest solar projects in Kentucky. Located in Winchester, the 60-acre farm features 32,300 solar panels producing enough electricity for 1,000 Kentucky homes. We have more solar projects planned in the coming decade." Find out more about EKPC's new generation projects

Jackery We've all gone a little tech crazy in the last 20 years. Most of us won't or can't leave home without at least our smartphone, a tablet, and maybe a laptop. And that's ...
