

How can remote communities benefit from Microgrid technology?

"Remote communities are well-positioned to demonstrate optimized microgrid technologies, including those that generate renewable energy locally. With the right design and innovation, microgrid solutions will help lower energy costs, improve energy resilience, and spur economic opportunities."

Are microgrids a potential for a modernized electric infrastructure?

1. Introduction Electricity distribution networks globally are undergoing a transformation, driven by the emergence of new distributed energy resources (DERs), including microgrids (MGs). The MG is a promising potential for a modernized electric infrastructure ..

Why is demand for microgrids growing?

Demand for microgrids is growing in large part because they offer resilience for today's energy needs. Microgrids are just one example of distributed energy resources. They generate...

Are Community Microgrids a true solution to e-mobility?

Microgrids are a true solution, but they need to align with the crucial Ps and Qs required to make distributed energy happen in the service of e-mobility. Those include planning... Community microgrids represent a burgeoning solution to meet the energy needs of localized areas and regions.

What happens if a microgrid is grid-connected?

If the microgrid is grid-connected (i.e., connected to the main electric grid), then the community can draw power from the main electric grid to supplement its own generation as needed or sell power back to the main electric grid when it is generating excess power.

Can time-of-day pricing improve the economics of microgrids?

It was reported that time-of-day pricing could, but not necessarily, improve the economics of microgrids, depending on whether net metering is allowed. Another previous study suggested that a high solar energy penetration (i.e., 33%) scenario does not necessarily lead to savings in electricity bills.

The 9th annual Microgrid Knowledge Conference was a truly charming event--in our somewhat biased but passionate opinions--when it happened this past April in Baltimore at the Marriott Waterfront. We connected ...
