

How reliable is the proposed microgrid system?

Moreover, the reliability assessment of the proposed microgrid system is also carried out with the following results: EENS = 46.9485 kWh/yr, LOLE = 34.1081 h/yr and LOLP = 0.003904. The reliability of the microgrid system under consideration can be improved with the integration of the WTG, PV and ESS as presented in Table 7.

How to evaluate the reliability of a microgrid design?

To evaluate the reliability of the proposed design, reliability concepts for power system application can serve as a basis to which the microgrid-specific aspects can be added. To estimate the significance and the severity of the events leading to the system interruptions, a quantitative reliability analysis is necessary.

Why is reliability optimization of microgrids important?

See further details here . Clean and renewable energy is the only way to achieve sustainable energy development, with considerable social and economic benefits. As a key technology for clean and renewable energy, it is very important to research the reliability optimization of microgrids.

What are the reliability indices of the proposed microgrid system?

This has further enhanced the reliability indices of the proposed microgrid system such as EENS, LOLE and LOLP with the following values: 1.3455×10^{-2} kWh/yr, 4.982×10^{-3} h/yr and 5.70×10^{-7} .

How can the results of a microgrid analysis be used?

The outcomes of the given analyses can, therefore, be used in the development of the new guidelines for microgrid design. To do so, it is necessary to extend the aforementioned analysis to provide complete and extensive information on the power electronics interactions and reliability impacts on the microgrid system.

What impact will power electronics reliability have on microgrid design & planning?

It is expected that the future microgrid systems will be heavily dominated by the renewable-based, power electronics-interfaced units. In such case, power electronics reliability will have significant impact on microgrid design and planning.
