

# My relatives in my hometown asked me to install photovoltaic panels

Should you go solar if your home is not suitable for solar?

If your home is not suitable for rooftop solar, you can still get the benefits of clean energy by investing in a community or shared solar program. By going solar, you can play an active role in achieving the nation's goal of a carbon-free electricity sector by 2035. For more information, visit the Homeowner's Guide to Going Solar.

Should I install solar panels on my home roof?

Before installing solar panels on your home roof, there are a few essential factors to consider: Assess your household's energy needs and consumption patterns. Understanding how much electricity you use will help determine the appropriate size and number of solar panels required to meet your energy requirements.

How do I choose a rooftop solar installer?

Rooftop solar is a major investment in lowering your electricity costs and carbon footprint, so it's crucial to work with a reputable company that has a proven track record of excellent workmanship and customer service. Research the installer whether or not they are performing the sale. As a baseline, they should have: Brian Lynch's advice:

Do you get tax credits if you lease a solar system?

When you own a system, you receive solar tax credits and incentives, but you won't if you lease. Some solar loans allow you to take advantage of the federal investment tax credit up front by allowing the loan provider or solar installer to take the credit in exchange for a reduced system cost or loan amount.
