

National Grid Mission Microfilm

Will National Grid achieve a net zero energy future?

National Grid's fossil-free vision will not only achieve a net zero energy future, and achieve the climate goals of the states in which we operate, but it will also provide additional, affordable clean energy choices so no customer or community is left behind on our clean energy transition:

What is National Grid's Net Zero Vision?

National Grid's fossil-free and net zero vision creates a clear roadmap for decarbonization and addresses the hardest-to-tackle issues of how to cleanly, affordably, and reliably heat our homes and business in a cold northeast climate.

What is National Grid's vision for fossil-free heat?

National Grid's vision for fossil-free heating is to enable their customers to have clean heating solutions available to them. Along the way, they can build an integrated energy network that is clean and renewable, achieving zero emissions.

What is National Grid's vision & values?

Our vision describes what we want to achieve in the long term, while our values shape our spirit, attitude and what guides us. At National Grid, our vision is to be at the heart of a clean, fair and affordable energy future.

Will National Grid eliminate fossil fuels?

National Grid's vision is to fully eliminate fossil fuels from our US gas and electric systems, enabling the customers and communities we serve to meet their heating needs without using fossil fuels by 2050, if not sooner. If playback doesn't begin shortly, try restarting your device.

How will National Grid maximize energy efficiency?

National Grid will maximize energy efficiency by continuing our nation-leading programs that provide rebates and incentives to customers to adopt energy efficient measures in existing buildings. We must also construct all new buildings to be highly energy efficient and ready for a net zero future.

[relinking] Home History Owners Mission How It Works How It Makes Money A Brief History of National Grid plc (NGG) Founding and Early Years National Grid was established in 1990 as a ...

Clean Energy & Sustainability. Clean energy provides the same power to homes and businesses as traditional energy sources without generating as many harmful pollutants. By lowering our emissions, we can reduce the negative impact of ...

Here are some key examples of our strong environmental performance: Connecting 1.35GW of new low carbon generation to the network. 17% reduction in controllable scope 1 and 2 emissions since FY19.
