

# Neighbors who install photovoltaic panels do not cut down trees

Can a neighbor cut down a tree that blocks solar panels?

For example, let's say you install solar panels but your neighbor has trees that grow too close to your roof and block the sun from hitting your panels. In this case, you may obtain a solar easement that instructs your neighbors to trim or cut down the tree that blocks your access to the sun.

Can a tree obstruct a solar panel?

However, if Neighbor A planted trees or had young trees that grew up to obstruct Neighbor B's existing solar panel, then the law may rule in favor of Neighbor B. Many states also permit solar easements, which are agreements between landowners to assure access to sunlight by restricting obstructive vegetation.

Does neighbor A obstruct neighbor B's solar panel?

That is, if Neighbor A's tree existed at its current stature before Neighbor B installed his solar panel, then the law may rule in favor of Neighbor A. However, if Neighbor A planted trees or had young trees that grew up to obstruct Neighbor B's existing solar panel, then the law may rule in favor of Neighbor B.

Can solar panels be installed on a property surrounded by trees?

Ultimately, solar panel installation companies have worked with all types of properties - including properties surrounded by trees. They know how to maximize the efficiency of your solar panels. They'll be able to determine if you should cut down trees, trim trees, or just leave them there.

Can a tree cast a shadow on a solar panel?

For example, California's Solar Shade Control Act prohibits someone who owns a property from planting or growing an obstructive tree if solar panels have already been installed and the tree or shrub would cast a shadow over more than 10% of the panels between 10 a.m. and 2 p.m.

Should you cut down a tree to install a solar panel?

As we found above, cutting down a tree to install a solar panel leads to a net positive impact on the environment. Of course, many homeowners can get away with simply trimming the tree - they don't need to totally remove the tree, which means you can boost your net positive environmental impact even higher.

In this blog, we'll explore the effects of trees on residential solar panels and provide strategies for mitigating potential issues. **Shade and Solar Panel Performance** The most apparent effect of ...

No, removing a tree does not negate the environmental benefits of solar energy. Solar panels have a very small carbon footprint, and even if you remove a tree to install them, the solar ...
