

New policy for solar power generation is released

What's new in solar energy development across the west?

WASHINGTON -- The Department of the Interior today announced an updated roadmap for solar energy development across the West, designed to expand solar energy production in more Western states and make renewable energy siting and permitting on America's public lands more efficient.

What does the 'Investing in America' Agenda mean for solar energy?

WASHINGTON, D.C. -- As part of President Biden's Investing in America agenda, the U.S. Department of Energy (DOE) today announced several new solar energy investments to cut home electricity bills and reduce local pollution.

Will solar power grow in 2025?

In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U.S. power generation for the next two years. As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatt-hours (kWh) in 2023 to 286 billion kWh in 2025.

Will solar power be a bright future?

Today, the Department of Energy (DOE) released a new issue brief that details a bright future for solar power, good jobs, and affordable energy in the United States.

How much solar power will a new president have?

The expansions to domestic solar manufacturing capacity announced since the President took office will grow the current 7.5 gigawatts of capacity by an additional 15 gigawatts of capacity, for a total of 22.5 gigawatts by the end of his first term - enough to enable more than 3.3 million homes to switch to clean solar energy every year.

Will solar power grow in 2023?

As a result of new solar projects coming on line this year, we forecast that U.S. solar power generation will grow 75% from 163 billion kilowatt-hours (kWh) in 2023 to 286 billion kWh in 2025. We expect that wind power generation will grow 11% from 430 billion kWh in 2023 to 476 billion kWh in 2025.

WASHINGTON (June 28, 2023) - Today, the U.S. Environmental Protection Agency (EPA) launched a \$7 billion grant competition through President Biden's Investing in America agenda ...

London, 7 May - Growth in solar and wind pushed the world past 30% renewable electricity for the first time in 2023, according to a report by global energy think tank Ember. Since 2000, ...

New policy for solar power generation is released

Solar is already the fastest-growing source of new electricity generation in the nation - growing nearly 4,000 percent in just over a decade, from about 2.5 gigawatts (GW dc) ...

The solar energy world is ready for a revolution. Scientists are racing to develop a new type of solar cell using materials that can convert electricity more efficiently than today's ...

The Department of the Interior today announced an updated roadmap for solar energy development across the West, designed to expand solar energy production in more Western states and make renewable energy ...

Decarbonizing the power grid by 2035 could total \$330 billion to \$740 billion in additional power system costs, depending on restrictions on new transmission and other infrastructure development. However, there is substantial reduction ...

DALLAS - Texas ranks first in the nation for wind power generation, second for solar power generation, second in the nation for battery storage, and third in the nation for the ...
