

How do solar plant operators submit maintenance reports?

The solar plant operators will submit their monthly maintenance report, to be attached to the periodic maintenance report, indicating any corrective maintenance. The periodic maintenance reports may be sent to the dispatch load centre in suitable format, if required. IBF International Consulting, EQO-NIXUS (OCA Global) and IDOM.

How is operations quality determined in PV plant operations?

In the field of PV plant operations, operations quality is determined by (1) the ratio of the amount of energy harvested to the potential amount of energy available for a particular plant and (2) plant equipment availability over time.

Which O&M best practices apply to PV power plants in-stalled?

Standard O&M best practices as described in section 5.1 also apply to PV power plants in-stalled in hot and humid climates. Additional key recommendations for O&M to prevent typical risks in PV power plants operating in hot & humid climates are given in the Table 10. Table 10: Recommendations for O&M of power plants in hot and humid climates.

Why is PV system operations a growing field?

PV system operations is a growing field because increasing PV penetration into the larger utility system, and an emerging market for ancillary services (e.g., dispatch of storage, sourcing reactive power, curtailment of output) require more system interaction on an ongoing basis.

Should a general contractor install a solar PV system?

A general contractor may face a choice between using an electrical subcontractor or a solar subcontractor to install the PV system. A good solar contractor will have the expertise in solar PV systems plus qualified electricians on staff.

What are open standards for solar monitoring systems?

As it relates to the quality of the solar monitoring system, open standards are applied at four levels: Information access to the data store from applications. High-quality monitoring systems can be built with proprietary methods that encourage lock-in to a single vendor.
