What's new in PV module design?

PV module surfaces are now connected to each other as standard. In the manual design, inverters can now be filtered using a text search. Performance optimization and fixing of minor errors. PV module mismatch has been added as loss factor in the advanced settings of the inverter sizing parameters.

How many inverters can be connected during manual sizing?

Systems with 3 orientations can now be connected to one inverter during the manual sizing. For example East+West on MPPT 1 and South on MPPT 2. The Tauro D variant (standard and ECO) can now be designed for up to 13.5A PV modules. Sizings with 3 MPP trackers are now also available for non-logged-in users.
