

Photovoltaic aluminum alloy trapezoidal clamp bracket

What are trapezoidal metal roof panel clamps?

Our trapezoidal metal roof panel clamps have a high quality finish and are made of durable and corrosion resistant materials. The clamps can provide significant cost savings for your solar roof installation projects because they no longer require the entire long aluminum rail columns, L-feet bracket. PV modules can be fixed directly to our rails.

Are mibet solar clamps suitable for trapezoidal metal roofs?

Mibet provides reliable solar solutions, suitable for a variety of trapezoidal roof shapes. Our aluminum clamps series is specifically designed for solar mounting installations on trapezoidal metal roof profiles. Our components are assembled in the factory beforehand, allowing significant savings in terms of installation time and labor costs.

How many attachment points does a solar panel clamp have?

Four attachment points enhance its holding strength. These clamps are compatible with various types of solar modules, and installation options for solar panels can be chosen with or without a guide rail. Furthermore, our project engineers can provide tailored solar panel installation solutions for trapezoidal metal roofs.

How do you install a protea bracket on a metal roofing panel?

The ProteaBracket is mounted directly onto the crown of the roofing panel, straddling the profile. No surface preparation is necessary. Peel adhesive backing and apply bracket to the metal roofing panel.

What is a protea bracket?

Combined with the S-5-PV Kit, the ProteaBracket is an integrally grounded solar panel mounting solution. Contact us toll-free: (877) 297-0014 for design assistance and wholesale S-5! ProteaBracket prices.
