

What is a DC combiner box?

Our DC combiner boxes offer users the possibility to integrate short-circuit and overvoltage protection, as well string monitoring solutions (I, V, T and SPD and switch isolator status), for PV systems using central inverters with PV panels in trackers and fix tilt systems.

Where can I find a photovoltaic array combination box?

Whether you are looking for a Photovoltaic Array Combiner Box for industry or a Photovoltaic Array Combiner Box for customized solutions, look no further than SNADI! SNADI offers a reliable 1000VDC Photovoltaic Array Combiner Box to simplify and streamline your solar PV installation.

How are PV DC combiner boxes tested?

PV DC combiner boxes are tested according to IEC-61439-2 and are constructed on the basis of the test results as well as assembled for the specific application. This ensures that each of the requirements of the target application is fully met.

What is a solar combiner box?

It acts as a central hub for connecting several solar panel strings, simplifying electrical connections, and increasing overall efficiency. With its advanced technology and top-notch features, this combiner box ensures seamless operation and maximum power generation from your photovoltaic array.

How many string inverters can a combiner box collect?

The combiner boxes allow to collect from 2 up to 6 string inverters in one single cabinet. They withstand ambient temperatures from -20 up to +50°C to operate in hardest climate conditions, fulfilling the highest market standards as per IEC 61439-2 ed 3.0:2020.

Can a string inverter be isolated from a PV system?

Furthermore, each string inverter can be easily isolated from the system to do maintenance tasks. The new PV AC Combiner boxes have been designed for PV systems with string inverters in trackers or fix tilt systems. The product portfolio is suitable for inverters from 60 kW up to 200 kW and support voltages of 400 V, 690 V or 800 V AC.
