

Photovoltaic inverter bracket installation diagram

How to install a PV inverter?

step 1: Rotate all the DC switches to "OFF" position. step 2: Check the cable connection of the PV string for polarity correctness and ensure that the open circuit voltage in any case does not exceed the inverter input limit of 1,100V. step 3: Connect the PV connectors to corresponding terminals until there is an audible click.

How do you mount an inverter to a bracket?

6 Hang the inverter on the bracket: Align the two indentations in the inverter enclosure with the two triangular mounting tabs of the bracket, and lower the inverter until it rests on the bracket evenly. Secure the inverter to the bracket using the two supplied 5mm screws.

How do I connect a photovoltaic generator to an inverter?

Before connecting the cables coming from the photovoltaic generator to the inverter DC inputs, the DC line MUST be disconnected by opening the integrated disconnect switch (-S/-FS versions) and any external disconnect switch on the DC line or by obscuring the photovoltaic panels.

How to install PV connectors?

4.5.2 Installing the PV Connectors. step 1: Rotate all the DC switches to "OFF" position. step 2: Check the cable connection of the PV string for polarity correctness and ensure that the open circuit voltage in any case does not exceed the inverter input limit of 1,100V.

How should a solar inverter be installed?

The humidity of the installation location should be below 100% without condensation. Do not install the inverter outdoors in salt, sulfur or other corrosive areas. Prevent the inverter from direct exposure to sun, rain and snow. The inverter should be well ventilated. Ensure air circulation. Never install the inverter in living areas.

How to check a photovoltaic inverter?

Check the inverter's DC side and string connections(see Par. 5.3). o Check the documentation on the sizing of the photovoltaic system and evaluate a possible change to the start-up voltage on the display (Ref. Par. 11.1). The inverter does not establish parallel connection with the grid. Insulation resistance to the photovoltaic eld <1Mohm.
