

Photovoltaic panel construction schedule

What are photovoltaic panels & how do they work?

They are designed for builders constructing single family homes with pitched roofs, which offer adequate access to the attic after construction. It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system, the most common in the industry today, will be installed by the homeowner.

Can a PV system be installed on a roof?

Nevertheless, it is possible to install PV modules on all roof types. If the roof will need replacing within 5 to 10 years, it should be replaced at the time the PV system is installed to avoid the cost of removing and reinstalling the PV system.

What is a solar ready building guide?

The Solar Ready Buildings Planning Guide is designed to influence the design of new buildings to minimize solar installation costs and maximize solar production potential. It outlines the scope of consideration in two sections.

What is included in a photovoltaic work package?

In general, each developer determines the degree of detail for themselves - theoretically, the work package can include work up to the installation of individual photovoltaic modules with detailed planning of all operations, for example, the installation of bolts and tightening nuts.

Why is grounding important for a photovoltaic system?

to Photovoltaic System Design and Installation" (California Energy Commission 2001). Grounding equipment provides a well-defined, low-resistance path from your system to the ground to protect your system from current surges from lightning strikes or equipment malfunctions. Grounding also stabilizes voltages and provides a common reference point.

Should solar panels be installed near Scenic Byways or historic corridors?

Solar facilities adjacent to scenic byways or historic corridors may negatively impact the rural aesthetic along these transportation routes. Buffering or screening may also be appropriate along main arterials or any public right-of-way, regardless of special scenic or historic designation.
