

Are PV modules regulated by the RCRA?

The federal Resource Conservation and Recovery Act (RCRA) is the only policy governing hazardous waste management in the US, and does not include specific requirements for PV modules. Several states have their own specific regulations.

Are photovoltaic panels regulated?

Following the revision of the Waste Electrical and Electronic Equipment (WEEE) directive in 2012, the collection, transportation, and treatment of photovoltaic panels have been subject to regulation in each individual member of the European Union (EU) since 2014.

Do photovoltaic panels release hazardous metals during thermal treatment?

The study by [unclear] explored the metals released into the gas phase and solid residue during a thermal treatment of photovoltaic panels at 600 °C, resembling typical recycling processes. The study identified the release of hazardous metals such as chromium and lead, which raises environmental concerns if proper treatment measures are not implemented.
