

How does pvkit work?

The PVKIT attaches the modules directly to the seams or ribs of the roof without the need for the addition of rails. The PVKIT is mounted to S-5! clamps and brackets according to roof type. The weight of PVKIT mounting is only 15% of rail mounting. Think of the savings in freight and logistics, not to mention added load to the roof structure!

What ancillaries can I attach to my PV array?

From service walkways to conduit, wire trays, optimizers, other MLPEs and monitoring equipment, you can use S-5! clamps, brackets and GRIPPERFIX®; universal utility mounting system to securely attach the above ancillaries to your PV array.

What do you need to install a solar panel?

and power optimizers to solar PV panel frames. Cable management clips for securing PV cables to the module frame. Clip to the underside of the module frame and electrically bond columns (stacks) of the PV array. Screws, nuts, bolts and more to make your solar installation successful.

How do you secure a solar module?

Cable management clips for securing PV cables to the module frame. Clip to the underside of the module frame and electrically bond columns (stacks) of the PV array. Screws, nuts, bolts and more to make your solar installation successful. Restrain, secure and support piping, conduit, condensate lines and other round shapes.
