

Photovoltaic panel frame pallet manufacturer

Will pvpallet revolutionize the way we ship solar panels?

At least that's our approach. PVpallet is the first solar shipping solution to revolutionize the way solar modules are handled and distributed.

What sizes does pvpallet offer?

Watch the Full Product Demo. PVpallet's solar panel pallet is available in two sizes. Series X is designed for solar modules between 63.5" and 83.5" in length. Series XL is designed for larger 90" modules. Custom sizing is available upon request.

What services does PVpallet offer?

PVpallet offers turnkey logistics, tracking, cleaning, and refurbishment services. These ensure that your reusable packaging fleet is traceable and in top condition, ready for deployment. PVpallet assists in driving efficiencies and process improvement at the branch and warehouse level, while significantly reducing waste and damage.

Does pvpallet perform load capacity testing?

**As all products can have unique loading patterns and shifting characteristics, PVpallet recommends that customers perform their own load capacity testing. PVpallet's standard is to target and test to the maximum weight limits as shown in the specifications. PVpallet does not warrant that all loads will perform the same as lab testing.
