

Photovoltaic panel installation electrician training

What is a solar installation training course?

Our solar installation training courses are designed to guide you as you prepare for a job in solar energy-- from the theory and science behind photovoltaics through the advanced skills needed to safely and effectively design, size and install a full solar PV array.

How do I become a solar installer?

The process to become a solar installer mostly depends on where an individual wants to install residential solar systems. Becoming a solar energy professional sometimes requires a state license specific to solar. In some cases it may only require an electrician's license.

Does NABCEP offer solar training?

Our introductory NABCEP course makes participants eligible to sit for the NABCEP PV Associate Exam, and, upon passing the exam, provides the solar training hours needed to qualify for the NABCEP PV Associate Certification. Is Solar Training Right for You? Solar installers determine the design of the array and perform the installations.

How do I become a solar energy professional?

Becoming a solar energy professional sometimes requires a state license specific to solar. In some cases it may only require an electrician's license. Each state regulates their own solar installation and safety process, and each state's regulations or rules are slightly different.

How do I become a PV installation professional?

You can choose to learn the skills needed to work in the field, become a sales-oriented professional, or gain your education hours needed for the NABCEP PV Installation Professional Exam. These courses are great for anyone with experience in construction, roofing or contracting.

What makes a good solar design and installation training program?

Solar design and installation training programs that are aligned with regional employer needs and available job opportunities ensure effective training-to-career pipelines. Curriculum should be based on employer-identified skills requirements and delivered in a way that meets the needs of learners.

This course is suitable for any electrician who wants to become a domestic solar installer & gain the skills to install solar PV (Photovoltaic) systems. PH 0800 7769 776 0 Shopping Cart
