

Are solar panels a good investment?

Due to technological advancements, increased competition, and healthy incentives, solar owners can save hundreds of thousands in energy costs over the life of their system. Today, installing solar panels is considered a long-term investment with strong rates of return-- much like buying a house.

Do solar panels add value if you move?

However, adding a solar system can still benefit you financially if you move. According to a few studies, solar panels increase your home's value by about 4%. Just be wary of leasing solar panels if you think you might move. Leases are typically long-term and can be difficult to cancel, making it more challenging to sell your home.

Do solar panels increase home value?

As such, a high solar return on investment can be most easily achieved when actively finding other ways to improve your home's energy efficiency. With a system that saves money on energy costs right on the roof, solar panels have been proven to increase home value.

Do commissions affect solar panels?

Commissions do not affect our editors' opinions or evaluations. How many years do you have to pay back solar panels? What is the average break-even time for solar panels? Does solar pay for itself? What happens after I pay off my solar panels? Confused about the payback period for solar panels?

Should you add solar panels to your home?

Adding solar panels to your home is the rare home improvement project that pays for itself. Once installed, solar panels make electricity that saves you from having to buy it from the utility company. Depending on your utility cost, the time it takes to pay back the initial investment can be very short.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).
