Should you buy or lease a solar panel?

Choosing the right solar panel financing option will make going solar more affordable and extend your long-term benefits. A solar lease can help you avoid hefty upfront installation costs and enable you to benefit from energy savings sooner. However, it can also negatively impact solar incentive savings and home value.

What is a solar lease & how does it work?

A solar lease is a long-term contract between a customer and a solar panel provider. For homeowners seeking to fulfill their energy needs without high utility bills, but who don't have the upfront capital to buy a system, solar leasing can seem like a viable option. What is Solar Leasing and How Does it Work?

Is solar leasing a good idea?

There are many benefits to going solar, but solar leasing also offers its own unique set of benefits. First, it reduces a customer's upfront costs to install panels, often to \$0. Using a solar lease means the maintenance and liability to damaged panels rests on the solar company rather than the homeowner.

Is solar leasing a better option than a PPA?

In many ways, solar leasing presents a competitive option compared with a solar power purchase agreement (PPA).

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. What is a solar lease?

Is a solar lease right for You?

A solar lease can help you avoid hefty upfront installation costs and enable you to benefit from energy savings sooner. However, it can also negatively impact solar incentive savings and home value. We researched the pros and cons of solar leasing and how it compares to other financing options so you can decide if a solar lease is right for you.
