

Photovoltaic panel operation and maintenance wages

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. Employment of solar photovoltaic installers is projected to grow 48 percent from 2023 to 2033, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.

What does a solar photovoltaic installer do?

Solar photovoltaic installers are key to the process of solar panel installation and maintenance. They use specialized skills to install residential and commercial solar projects. They are responsible for safely attaching the panels to the roofs of houses or other buildings and ensuring that the systems work.

What skills does a solar photovoltaic installer need?

Solar photovoltaic installers must be able to work with power tools and hand tools at great heights, and possess in-depth knowledge of electrical wiring as well as basic math skills. When necessary, installers must be problem solvers, able to repair damaged systems or replace malfunctioning components.

Why should you hire a solar photovoltaic professional?

These professionals ensure that solar photovoltaic (PV) systems are expertly installed and functioning optimally on residential, commercial, or industrial properties, contributing significantly to energy efficiency and environmental sustainability.

Do plumbers & electricians work on solar installation projects?

Plumbers and electricians working on solar installation projects must also have specialized training on the systems that they will be installing, or they must work under the supervision of a qualified solar photovoltaic installer.

What if a solar panel is damaged during installation?

Workers use caution during installation because the panels are fragile, expensive, and weigh at least 40 pounds each. If the panels are damaged during the installation process, the company has to cover the cost of repair or replacement. Solar photovoltaic installers typically have a background in construction or as electricians.
