What is a 'solar panel rate' scam?

This is a common scam used to gather personal data and/or trick people into signing long-term solar lease agreements that are far less favorable than owning solar panels. For example, in February 2023, a Facebook page called "Solar Panel Rate" ran multiple ads claiming Elon Musk was paying homeowners \$2,500 to test out new solar technology.

Where can I find information about solar panels?

Browse and compare solar panels from top manufacturers on the EnergySage Buyer's Guide. To learn about other solar energy system components, visit EnergySage's solar inverter and solar battery buyer's guides. Solar panels are the key component in any residential, commercial, or utility-scale solar energy system.

Are solar panels a good investment?

It's most helpful to think about solar panels as an investment. It takes an average of 7.5 years to earn back the money you spend on installing solar panels. After that point, the electricity from your solar panels is free. Most homeowners will save \$28,000 to \$120,000 over 25 years with solar.

Are solar panels cheaper?

Utility-scale solar installations are now cheaper than all other forms of power generation in many parts of the world and will continue to replace older, dirtier power plants that run on coal and natural gas. Additionally, homeowners are now able to own their power production more cost-effectively than ever before. How much does a solar panel cost?
