

# Photovoltaic panel size and price

Do solar panels cost a lot?

Solar panel costs vary from state to state, partly due to the area's average electricity bill and solar suitability. For example, Hawaii pays the most for electricity, while Utah pays the least. Those in Hawaii stand to see bigger savings than those in Utah when going solar.

How much does a rooftop solar system cost?

**Mounting system:** This is what holds rooftop solar panels in place. Costs vary depending on the type of solar installation, but it generally costs between 7 and 20 cents per watt. **Electrical wiring and hardware:** This includes the wiring, switches and circuit breakers required to connect the solar panel system to your home's electrical system.

How much does solar installation cost?

Installation labor accounts for around 5.5% of the total cost of a residential solar project, according to a 2022 report from the National Renewable Energy Laboratory. That amounts to \$1,375 for a \$25,000 solar project.

Are solar panels cheaper?

Utility-scale solar installations are now cheaper than all other forms of power generation in many parts of the world and will continue to replace older, dirtier power plants that run on coal and natural gas. Additionally, homeowners are now able to own their power production more cost-effectively than ever before.
