

How much does it cost to install solar panels on a roof?

The cost of a dual installation of solar panels and a roof is a large purchase for most homeowners. According to the National Renewable Energy Laboratory (NREL), the average installation cost for a residential rooftop solar array alone is \$19,000. If the solar array is installed simultaneously with a new roof, the average is \$25,000.

How much does a rooftop solar array cost?

According to the National Renewable Energy Laboratory (NREL), the average installation cost for a residential rooftop solar array alone is \$19,000. If the solar array is installed simultaneously with a new roof, the average is \$25,000. These costs can be mitigated, too.

Are solar shingles more expensive than solar panels?

The cost for this project can vary depending on your roof size, slope, and pitch, as well as the cost of installation in your area. Solar shingles tend to be more cost-efficient than solar panels. We help homeowners make confident decisions through our reliable, up-to-date, and unbiased information and average project costs.

Is a solar roof better than a traditional roof?

However, a solar roof reduces electric bills, is usually considered more aesthetically appealing than solar panels, and is more likely to receive HOA approval in some communities. Traditional solar panels produce more power, cost less, and provide a higher return on investment (ROI) than a solar roof. Does a solar roof increase home value?

Can I install a new roof if I have solar panels?

Though you can install a new roofwhile panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.
