Should you invest in solar energy stocks in 2024?

Investing in solar energy stocks in 2024 presents an opportunity due to several factors. The global push for renewable energy sources intensifies, with a heightened focus on combating climate change and reducing carbon footprints. Solar energy remains a pivotal component of this transition towards clean energy solutions.

Are solar stocks a risky investment?

In such an environment, solar stocks as a group remain higher risk than other sectors on Wall Street. Still, the long-term promise of solar remains significant in the age of climate change - so many investors are eager to get a foothold in the industry, regardless of the challenges.

Should you invest in a solar energy ETF?

Investors who don't want to focus on specific stocks may want to consider exchange-traded funds (ETFs). Within the solar sector, there are two solar energy ETFs, the Invesco Solar ETF (ARCA: TAN) and the Global X Solar ETF (NASDAQ: RAYS).

Should you diversify your solar portfolio?

For instance, balancing solar stocks with consumer staples and tech can offset the impact of solar demand. Secondly, diversification spreads one portfolio over several asset classes, reducing exposure to the vulnerabilities of any single asset class.

Is FSLR a good solar stock?

And considering FSLR was founded way back in 1999, this is a company with deep roots as well as a bright future if and when the solar sector takes off. Enphase Energy is among the largest solar stocks by several measures, with a market value more than double some of its peers and annual revenue that will top \$1.4 billion this fiscal year.

Why are investors optimistic about solar energy investments?

This unmistakable investor optimism was fueled by investments in the global solar energy sector since solar investments not only continued to account for the largest percentage share of the total renewable energy investment pie but also pulled the overall growth figure upwards.
