

Photovoltaic panels installed on rooftop contracts

Can I install a new roof if I have solar panels?

Though you can install a new roof while panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's suitability.

Who owns the solar panels on my roof?

The solar panels on your roof are owned by the PPA provider, not you. But instead of paying for the system, you pay a monthly fee for the energy it produces. Since those contracts usually cover a 25-year period, you essentially agree to purchase your energy in advance for a pre-negotiated price.

How much does it cost to install solar panels on a roof?

The cost of a dual installation of solar panels and a roof is a large purchase for most homeowners. According to the National Renewable Energy Laboratory (NREL), the average installation cost for a residential rooftop solar array alone is \$19,000. If the solar array is installed simultaneously with a new roof, the average is \$25,000.

What is a solar photovoltaic (PV) installation?

A solar photovoltaic (PV) installation comes with a proposal and a contract, so if you're thinking about going solar, it's important to understand what you'll be signing.

Should homeowners pay for solar panels upfront?

Homeowners who pay for their panels upfront with cash, or through a solar loan, will see something different than someone who signs a solar lease or solar power purchase agreement (PPA). While solar contracts will differ by provider and project, most of them contain a certain amount of shared verbiage and content.

1. Roof Damage. One of homeowners' main concerns when considering solar panel installation is the potential for roof damage. While solar panels themselves will not inherently damage your roof, an improper ...
