

Photovoltaic panels installed on tiles by yourself

Can solar panels be installed on tile roofs?

Ensure that your roof integrity is preserved by taking an active role in your upcoming solar installation. While installing solar panels on tile roofs is certainly possible, it requires the right technique and knowledge. See how SunPower can protect your roof's integrity while providing the world's best solar.

Should a tile roof be inspected before installing solar panels?

Assessing the condition of your tile roof before installing solar panels is critical to ensure the longevity of both your roof and solar system. Any existing damage, such as cracked or broken tiles, should be repaired or replaced. This not only prevents potential leaks but also provides a solid foundation for the solar panel mounting system.

Are You Ready to install solar panels on your home?

When you're ready to install solar panels on your home, there are many factors that will determine the unique design and cost of your SunPower solar system. Various roof types require different installation processes. For example, lightweight tile roofs can present unique challenges and considerations for a solar installer.

How do you install solar panels on a roof?

Your installer would temporarily remove the tiles, install the hooks underneath into the roof, then put the tile back over the mount, and rack the system from there. The second option is called a comp-out, where your installer will remove the tiles where you intend to put solar, then lay down composite shingle to install the array.

How do solar panels mount on a tile roof?

Specialized mounting systems designed for tile roofs are used to secure the solar panels in place. These mounting systems are typically made from durable materials like aluminum or stainless steel to withstand the elements.
