Each blade is then hand-finished, deburred, and cleaned for optimal performance. Material options for Essco doctor blades and scraper blades include: Essco cotton-based blades offer economical water and fiber removal for forming sections and soft press rolls on certain paper machines.

Why are solar silicon grades important for the photovoltaic industry?

Most processes in the photovoltaic value chain operate at high temperature and in an extremely corrosive environment. At the same time, high purity and precision are required to produce solar silicon grades. Our materials are indispensable to fulfill the tight specifications of the photovoltaic industry.

What is carbon fiber reinforced polymer (CFRP)?

Carbon fiber reinforced polymers (CFRP) are utilized in infrastructure projects for strengthening bridges, buildings, and other structures, providing lightweight and durable solutions.

Can rugged solar panels be used in off-grid areas?

Armageddon has worked with the US Air Force and the University of Dayton Research Institute (Dayton, OH, US) on a pilot project to show the value of rugged solar panels for military operations in off-grid areas. More than 50 of its version 2.0 composite panels were constructed for that project.
