

Which solar cells can be soldered with ecoprogetti Stringer machines?

Ecoprogetti's stringer machines are designed to work with all the solar cells available on the market (from 166mm to 210 mm), full and half cut. The best soldering output with minimal stress given to the solar cells, realizing high-quality photovoltaic modules with minimized breakages during the transformation process.

What is a solar Tabber Stringer machine?

The best soldering output with minimal stress given to the solar cells, realizing high-quality photovoltaic modules with minimized breakages during the transformation process. The solar tabber stringer machine is used to weld solar cells to strings.

What is a solar Stringer machine?

The solar stringer machine is used to solder solar cells together with the use of bus bars into forming strings. This category of assembly equipment is one of the most sensitive since the soldering of the connections is what enables the photovoltaic module to transmit electricity.

How does a photovoltaic module manufacturing line work?

The first phase in a photovoltaic module manufacturing line is joining the solar cells, which is done by a solar tabber and stringer, a totally automatic machine able to optimise the very delicate phase of stringing and tabbing.

Why should you choose Tabber & stringer for PV module production lines?

Tabber & Stringer for PV module production lines. Our combined Tabber & Stringer machines are accurate, reliable and easy to operate. Our proven technology, combined with a modular design and advanced features are key factors for a very low Total Cost of Ownership and high productivity.

What is Greenwell technology's vision for a PV manufacturing line?

Our vision at Greenwell Technology is that a PV manufacturing line should:

- o Be adapted for the current technology, to be competitive today.
- o Not be a limitation for future evolutions in cell/module technologies
- o Specific machinery for present and future technology with high performance.

Shingled stringer is an automatic equipment to weld the solar cells into strings by curing the conductive adhesive and collect the welded strings (or transfer them directly to the later ...

166 182 210 Full Automatic Pv Bussing Machine Solar Cell Strings Welding Machine Machine Function. Adopt the method of separating the cell string from the glass, and grab the cell string ...

Solar cell stringer machines are efficient and automatic soldering equipment for serial connection of solar cells

Photovoltaic street light panel string welding machine accessories

into strings. The soldering machine applies infrared soldering and automatic cutting to different solar strings. The cut strings will ...

By purchasing a solar tabber and stringer, your company will reduce working time and maximise performance of the entire photovoltaic module manufacturing line. Ecoprogetti Srl offers its customers the ET700 3B solar ...

Improved quality control in cell and string production; Easy integration with the MES system; Autodiagnosis; Ergonomic, easy access to any part of the machine; A smaller machine that is easier to assemble and optimises space; Patented ...

Cell string spacing: 10-40mm. Max string welding length: ≤ 2250 mm. Welding tape specifications: Thickness 0.2mm, width 1.0mm(6BB), Thickness 0.2mm, width 0.7mm (9BB) Fragment rate: ≤ 3 % (positive grade-A ...

Ecoprogetti's stringer machines are designed to work with all the solar cells available on the market (from 166mm to 210 mm), full and half cut. The best soldering output with minimal stress given to the solar cells, realizing ...

Tabber Stringer is used to weld solar cells to strings; Solar cell stringer machine OCH1500 adopts IR soldering method, servo motor driving and industrial ccd positioning & detection for defective solar cell excluding automatically. T - We ...

Back Contact Cell Welding Machine is suitable for welding BC series cell strings LONGI Solar Cell - We provide solar panel production line, full automatic conveyor with full automatic laminator, ...

Auto Trimming Machine The trimming machine can adapt to different sizes and shapes of panels and has a series of merits like high trimming quality, precision and speed, low noise and easy ...

Update the traditional PV line to the newest MBB solar panel production line. Tabber Stringer is used to weld solar cells to strings; Solar cell stringer machine OCH1500 adopts IR soldering method, servo motor driving and industrial ccd ...

Shingled solar cell terminal head welding machine is an automatic equipment to do welding at both heads of solar module string cells with the ribbon. - Full Auto Solar Panel Making ...

When soldering, the starting point of the soldering iron tip should be on the left side of the single chip, and the flat surface of the soldering iron tip should always be close to the soldering tape. ...
