

Should you sell your solar equipment at a solar auction?

The flexibility to sell single parts comes in handy for legacy models or project leftovers that attract buyers who are looking for replacement parts. While on auction sites, solar equipment lot sizes are large (usually starting at 500 kilowatts and spanning into megawatt levels).

Can auctions strengthen VRE integration?

Also, integrating large shares of variable renewable energy (VRE) - namely wind and solar PV power - calls for specific measures. Specific characteristics of VRE technologies affect power system operation. Auctions, however, can strengthen VRE integration by ensuring procurement of the system-friendliest power plants.

How do auction sites work?

For example, when a manufacturer wants to move surplus equipment quickly, they see auction sites as a suitable way to round up a pool of buyers who bid at a pre-determined time. At the bid's closing, they expect to receive a winning bid at or above their minimum reserve.

Are offshore wind auctions undersubscribed?

Onshore wind auctions in Germany, for example, have been undersubscribed since 2018, when the design of the auction was changed to require projects to obtain permits in order to bid. At the same time, the permitting process became harder and lengthier, taking 700 days in 2018, up from 300 days in 2016 (WindEurope, 2018).

With the increasing penetration of distributed photovoltaic in distribution network, it is more difficult to control active distribution network (ADN). A flexible interconnection device ...

Production Support and General Plant Equipment. Main Extraction Line Support Equipment Includes: o (3) Automatic 300 litre based centrifuges by Nanjing Kingreat, model PPTD-300 o Mobile & stationary ...

The company has provided customers with a series of customized solutions for photovoltaic support. ... Dalian Eastfound Solar Equipment Co., Ltd. is headquartered in Sanshilipu Harbor ...

5 &#0183; Serbia's upcoming second renewables auction, scheduled for later this month, aims to procure 124.8 MW of solar power with a ceiling price of EUR72 (\$75.30)/MWh. ... German PV equipment company ...

The findings in this report support the business case for a robust and sustainable secondary market for PV hardware reuse, resale, and recycling. Using the EnergyBin trading exchange as a gauge for this case, we see a ...
