How do you disassemble a wood pallet?

To take apart a wood pallet, you can use a pry bar. Wedge the pry bar where the nails look loose and move it back to lift the wood piece and loosen it. Do not lift the board all the way up to loosen the nail. Do not attempt to remove the entire board at once.

Are reclaimed wood pallets a good idea?

Reusing and recycling reclaimed wood pallets helps save mother earth in some form. They are a good idea because they are built for stability, but breaking them apart requires good planning if you want to reclaim the wood. If you're planning to create a wood project out of reclaimed pallets, it is important to learn how to take apart a wood pallet.

How do you construct a pallet using wood slats?

To construct a pallet using wood slats, you'll first need to identify the two major vertical wood pieces on the pallet. The horizontal slats (2 x 4) should be nailed to these wood pieces to build the top pallet surface. You'll have to cut through the nails where the vertical and horizontal slats meet along the vertical wood pieces.

How do you cut pallet boards?

Cut the ends of all the top boards, as you did on the bottom side. Pry the boards free from the central stringers with your pallet buster tool. Remove all embedded nails from the pallet boards, placing them in your can or bucket. Pry all board offcuts free of the outer stringers. Pull out or cut off all nails protruding from the stringers.

How to choose a wood pallet for disassembly?

When choosing a wood pallet for disassembly, select one that displays no sign of deterioration. While it might be easier and simpler to disassemble a pallet that is damaged, the pallet is more likely to be ruined beyond use. Do not use regular tools to take apart the wood pallets.

How do you separate two pallets?

Cut off straps within the two pallets, and use a forklift to separate the two pallets. Cut off the packing straps of the single pallet, then remove the isolated wood (or plastic wrap) and the carton cover. 5.
