

Price list of saw blades for photovoltaic brackets

What types of saw blades do you offer?

The variety of saw blades we offer can cut through metal, plastic, plywood and wood, ensuring you'll find the blade for your specific application. Our blades come in bi-metal, carbon and high-speed steel and many resist overheating during use.

How do I choose a saw blade for my project?

Choose from single-blade or multi-blade packages to fit your project's requirements. Additionally, [Lowe's.com](#) offers blades with different numbers of teeth-per-inch. Select a saw blade with more teeth for a smoother cut. Saw blades with fewer teeth remove material faster and allow you to power through your project.

What types of blades are available?

Our blades come in bi-metal, carbon and high-speed steel and many resist overheating during use. You'll find many widths and lengths of blades that are designed to universally fit any saw of specific dimensions.

How do I choose a power saw?

Select a saw blade with more teeth for a smoother cut. Saw blades with fewer teeth remove material faster and allow you to power through your project. For more information on power saw types, uses and power saw safety tips, check out our buying guide -- [Which Type of Power Saw Do I Need?](#) -- at [Lowe's.com](#).

Does Lowe's have a saw blade?

Whether you're making curved cuts, slicing lumber into thinner sections to generate veneers, or precisely crafting the mortise-and-tenon joints used to securely connect two pieces of wood, [Lowe's.com](#) has the saw blade for your cutting needs. We also offer metal cutting band saw blades for projects that involve pipe-cutting, for example.

Why do you need a band saw blade?

Quality band saw parts are key to optimizing saw performance and project quality. Whether you're making curved cuts, slicing lumber into thinner sections to generate veneers, or precisely crafting the mortise-and-tenon joints used to securely connect two pieces of wood, [Lowe's.com](#) has the saw blade for your cutting needs.
