

# Ranking of photovoltaic shipments bracket

Do I need to report a monthly photovoltaic module shipment report?

Beginning in January 2017, we required some of the respondents for the annual survey Form EIA-63B, Photovoltaic Module Shipments Report, to report monthly data. The subset of respondents now must report monthly accounts for about 90% of photovoltaic (PV) activity in the United States, based on 2021 data.

When are photovoltaic module shipments published?

Source and disposition of photovoltaic module shipments U.S. shipments and sales to the original equipment manufacturer (OEM) for resale and export shipments are not published for January and August to protect individual company data. Table 7. Photovoltaic module import shipments by country

How many GW of solar modules are shipped in 2022?

In 2022, top four manufacturers each shipped more than 40 GW, at least 20 GW more than the fifth. InfoLink estimated that the top 10 manufacturers shipped around 252 GW of modules, a 166% year-on-year increase. The top four dominated 60-65% of global shipment volume, heightening that the big stays big.

Do you have to report a monthly photovoltaic account?

The subset of respondents now must report monthly accounts for about 90% of photovoltaic (PV) activity in the United States, based on 2021 data. Data collected on both the monthly and annual Form EIA-63B are protected from disclosure of individual company data. As a result of this protection, monthly data are not published in some tables.

Which solar brands have the lowest GW volume in 2024?

The lowest volume reached 20 GW among those ranked fifth to eighth. DAS Solar was ranked ninth, followed by First Solar/GCL/Yingli/DMEGC that tied for the tenth. Older brands returned to the top-10 list this time, indicating the continuation of fierce competition into 2024.
