

Ranking of wind power generation leaders

Which country has the most wind power?

China is the world leader in wind energy, with over one-quarter of the world's wind power capacity. The country has the world's largest onshore windfarm in Gansu Province, built out of the Gobi Desert. The project's 10GW peak capacity sits a long way above its closest rival at time of writing, though announced projects will soon rival it.

Which countries produce the most wind energy in 2022?

In the context of regional growth, the Middle East, Latin America, South East Asia, and Africa saw their combined contributions to wind power generation increase from 8% to a promising 10% in 2022. China, the global leader in wind energy generation, produced a staggering 466.5 MWh in 2022, accounting for over 40% of the world's wind energy.

How much wind power does the world need?

The world's installed wind power capacity now meets around 10% of global electricity demand - another important milestone. More than ten countries now have a wind power share of more than 20%, led by Denmark, which generates an astonishing 56% of its electricity from wind.

Which countries are driving global wind power growth in 2023?

Global wind power installations reached a new high in 2023, increasing renewable energy's share of total power generation to 30%. China continues to be the driving force behind wind power expansion, accounting for nearly 66% of global capacity additions last year.

Which countries have the best wind power markets?

Emerging wind power markets, such as Brazil, India, and Mexico, hold their own against traditional markets, ranking in the top 13 globally. This signifies a positive shift towards renewable energy in these rapidly developing economies.

Why are countries building more wind power?

Across the world, countries have built more wind power than ever before as part of the energy transition. Credit: Artem Ro. Wind power sits at the heart of the energy transition for many countries. The race to build bigger, better wind turbines mirrors the efforts of global governments to increase their renewable power generation.

China continues to dominate wind power generation with 466.5 MWh, followed by the United States at 341.4 MWh, and Germany at 132.1 MWh. Denmark, while ranking 15th in total wind power generation, leads the world in terms of the ...

Ranking of wind power generation leaders

The increase in global wind power share to 10% of electricity generation marks a significant milestone towards our goal of a cleaner, more resilient energy system. Countries like Denmark, leading with 56% of its ...

Wind power refers to the electricity generated by turbines powered by the wind, usually in the form of windmills. Wind power is considered to be a clean and renewable source of energy, as it is created by natural elements, unlike oil ...

86 · Wind power's share of worldwide electricity usage in 2022 was 7.3%, up from 8.9% from the prior year. [3] In Europe, wind was 11.2% of generation in 2022. [3] In 2018, upcoming wind power markets rose from 8% to 10% ...

1. Vestas. The Danish wind turbine manufacturer Vestas is currently the world's largest wind turbine maker, representing over 16% of the world wind turbine market. The company was founded in 1898 and is ...

China is cementing its position as the global leader in renewables development with 180 GW of utility-scale solar and 159 GW of wind power already under construction¹. The total of the two is nearly twice as ...

1. China - installed wind capacity of 342GW. China is the world leader in wind energy, with over one-quarter of the world's wind power capacity. The country has the world's largest onshore windfarm in Gansu Province, built ...

In 2021, Brazil held the seventh position globally in terms of installed wind power, totalling 21 GW, and ranked as the fourth-largest wind energy producer worldwide, generating 72 TWh. Notably, Brazil trailed behind ...

In 2023, China was the country with the largest energy production from wind, with some 885 terawatt hours. The United States ranked second by a wide margin, with roughly half of China's production.
