

Real estate solar power generation

Is solar a good investment for real estate?

The real estate market is embracing solar, making it vital that real estate agents, appraisers, and homeowners increase their solar knowledge and leverage the premium-boosting power of a solar system to sell or refinance their homes.

Is real estate a good source of energy?

The sun is the ultimate source of almost all the energy used on earth, and trapping that energy is cheaper and more efficient than ever before. Solar is the fastest-growing form of renewable energy, and real estate can play a significant part in that growth story.

Is your commercial real estate project solar-ready?

Another trend in commercial real estate is that more projects are being built solar-ready with infrastructure, such as reinforced roofing, conduits, and space for equipment. This enables the property to more easily accommodate solar installation in the future.

Are solar panels a good fit for real estate?

Cheaper, more efficient solar panels and the modular nature of energy production makes solar power the perfect fit for real estate, allowing the sector to evolve and embrace solar's huge potential. The International Energy Agency (IEA) forecasts renewables will overtake fossil fuels and nuclear in electricity generation by 2026.

Should commercial real estate owners install solar panels?

Commercial real estate owners who install solar can benefit from lower electricity costs. The Solar Energy Industries Association estimates an average US office building could save 20-40% on its annual energy bill from installing solar panels.

Should you buy or sell a solar home?

With nearly one million solar energy systems installed on residential rooftops across the country, buying or selling a solar home is getting more and more common. Just like a renovated kitchen or a finished basement increases a home's value, solar has been shown to boost home valuation and shorten a home's time on the market.

The real estate market is embracing solar, making it vital that real estate agents, appraisers, and home owners increase their solar knowledge and leverage the premium-boosting power of a solar system to sell or refinance their homes.
